Summary

I am a versatile professional with a background in seafaring and IT. Previously worked as an IT staff for a Quadruple A construction company in the Philippines, where my responsibilities included ensuring accurate weekly payments for workers by efficiently extracting, analyzing, and encoding biometric attendance data. I also played a pivotal role in the implementation of a third-party automated payroll system across various construction sites.

I am presently dedicated to honing my skills in HTML, CSS, and the MERN stack, with the goal of becoming a highly proficient software developer. I am actively on the lookout for fresh opportunities within the software development field and am eager to apply my acquired skills to build a rewarding and prosperous career in this dynamic industry.

Experience

IT Staff/Payroll Clerk

TERP ASIA CONSTRUCTION CORPORATION

Oct 2022 - Sep 2023 (1 year)

Deck Cadet

Projects

1. Web Developer Portfolio

Link: <https://rgee.vercel.app/>

My web developer portfolio made using Reactjs.

2. Galaxy Guardians

Link: <https://master--galaxyguardians.netlify.app/>

This is my second project in Uplift Code Camp. A space invaders-like game made using HTML canvas, CSS, and Javascript.

3. Task24

Link: <https://task24todoappbyrg.netlify.app/>

This is my third project in Uplift Code Camp. A fullstack todo app made using MERN stack.

4. Branded App

Link: <https://brandedapp.vercel.app/>

This is my final project in Uplift Code Camp. An app wherein you can create, customize and build your own website. This is a group project and I worked mostly on the back-end part of the app.
